We're currently applying the finishing touches to the timetable, which will be posted online very soon. And - very, very important - we're still looking for some extra volunteers. The festival is only possible with your help and support! Every year we have many people from previous GOGBOT editions coming back to help us again, but we are also always looking to have new people join the team.

GOGBOT

WANTS YOU!

12 - 15 sep. @ Enschede, NL

GOGBOT Festival is kicking off this upcoming Thursday 12 September, and preparations are in full swing!

Brace yourself for four days of mind-bending collision of art, music, and

tec that's taking over Enschede and will blow your senses wide open.

We're currently applying the finishing touches to the timetable, which will be posted online very soon. For now, you can explore the program on our [website](#).

And - very, very important - we're still looking for some extra **volunteers**. The festival is only possible with your help and support! Every year we have many people from previous GOGBOT editions coming back to help us again, but we are also always looking to have new people join the team. [Sign up](#) for a shift and get food & drinks during your working days, a t-shirt and free tickets to the [afterparty](#) on Saturday in Metropool.

GOGBOT 2024

HIGHLIGHTS

In Vitro - Larissa Sansour/Søren Lind

The dystopian science-fiction shortfilm *In Vitro* (2019) imagines a post-apocalyptic Palestine. It takes place in a gigantic concrete bunker, many years after an eco-catastrophe struck the West Bank city of Bethlehem.

[→ click for trailer](#)

Atem - Ausgang Studio

A technological, alienating landscape - both beautiful and horrifying - creates a sensory overload. Can you handle it?

[→ click for more info](#)

Make It Fit - Tingyi Jiang

A hypnotic propaganda performance filled with grotesque singing. Tingyi dissects and contextualizes, repeats and plays with language in an experience that balances between sound and sensation, signal and noise, story and poetry.

[→ click for](#)

SnsOnik II - "Pit" Hubert & Snsitiv Collective

Play with this structure by moving your hands over sensitive areas, generating a spatialised sound universe and interactive light interaction.
